*ST-ST = Sternum to Stomach

PHYSICAL AGGRESSION PROTECTIVE VEST SIZING INSTRUCTIONS

1. **Measure your chest** and find this in Column One of the size chart – this gives you a basic size.
2. **Measure your stomach** – around the belly button area – this give you a ‘wrap’. The wrap is split into three sections on the chart – Standard, Wide, Extra Wide.
3. Your wrap size should fall into one of the boxes next to your basic size eg. Chest measures 46” and Wrap measures 44” – you are XL Wide on the chart.
4. If your wrap measurement does not fall into any of the choices next to your Chest measurement then you will need to have a ‘Moulded to Measure’ filler. Your wrap may be smaller, larger or equal to your Chest measurement and these are all classed as MTM. Please submit your measurements for specific sizing in this case.
5. Female fillers should also request to be made as Extra Curved.
6. **Sternum to Stomach** (Nape of the neck to belly button) is used as a guide to assess length of body. This information is used in conjunction with your total height to assess whether you need a longer than standard filler (also an MTM Filler). If your sternum to stomach measurement falls outside of those given in the size chart please submit your measurements and height for individual sizing.
